Holidays in **Outreach on These Holidays** now reflect only the **actual holiday date**, not the observed holiday date. This gives customers more control over which days outreach calls go out.

BACKGROUND

A prior change (**CIP-9068: Ability to Override Holiday Blockages for Outreach**) partially addressed holiday configuration issues, but Support still had to do significant manual work. The root problem was that actual and observed dates were bundled into a single holiday, which confused customers.

Important: The fixes from CIP-9068 should remain in place. This release builds on that work.

CIP-9068 loosened validation so customers can add a date to **No Outreach on These Dates** even when that date falls within a holiday — as long as that holiday is in the **Outreach on These Holidays** allowlist. For example, if Independence Day is in the allowlist, a customer can add July 4 to **No Outreach on These Dates** to block outreach on the 4th while still allowing it on the 3rd.

WHAT CHANGED

The system now uses **only the actual holiday date** in the holiday list. Observed dates are no longer included as part of the holiday definition.

If outreach needs to be blocked on an observed date, add that date manually in **No Outreach on These Dates**.

EXPECTED BEHAVIOR

1. Holidays block only the actual date

When a holiday is configured, it applies only to its actual calendar date — not any observed date.

Holiday	Actual Date
Independence Day	July 4 only
Juneteenth National Independence Day	June 19 only
Veteran's Day	November 11 only
Christmas Day	December 25 only
Christmas Eve	December 24 only
New Year's Day	January 1 only
New Year's Eve	December 31 only

If Independence Day is in **Outreach on These Holidays**, outreach will go out on **7/4 only**. It will not affect any other day (including 7/3).

2. Observed dates are not treated as holidays

Observed dates are **not** holidays in the system. They can be added to **No Outreach on These Dates** without validation issues.

For example, to block outreach on **7/3/2026** (the observed date for Independence Day in 2026), add **7/3/2026** to **No Outreach on These Dates**. If you do not add it, outreach proceeds as usual on that date.

CONFIGURATION GUIDE — INDEPENDENCE DAY 2026

Independence Day 2026: **actual date = 7/4**, **observed date = 7/3** (Friday). Use the two fields together:

- Outreach on These Holidays** — allows outreach on a holiday's actual date
- No Outreach on These Dates** — blocks outreach on specific dates (including observed dates)

SCENARIO 1

Customer wants outreach on BOTH 7/3 and 7/4

1. Add **Independence Day** to **Outreach on These Holidays**

Result: No other changes needed. Outreach is allowed on both days.

SCENARIO 2

Customer does NOT want outreach on 7/3 OR 7/4

1. Ensure **Independence Day** is **NOT** in **Outreach on These Holidays**
2. Add **7/3/2026** to **No Outreach on These Dates**

Result: 7/4 is blocked automatically; 7/3 is blocked via the date list.

SCENARIO 3 · MOST COMMON

Customer wants outreach on 7/3 but NOT 7/4

1. Ensure **Independence Day** is **NOT** in **Outreach on These Holidays**
2. Ensure **7/3/2026** is **NOT** in **No Outreach on These Dates**

Result: Normal outreach on 7/3; 7/4 blocked because Independence Day is not in the allowlist.

SCENARIO 4 · LEAST COMMON

Customer wants outreach on 7/4 but NOT 7/3

1. Add **Independence Day** to **Outreach on These Holidays**
2. Add **7/3/2026** to **No Outreach on These Dates**

Result: Outreach allowed on 7/4; 7/3 is explicitly blocked.

STATIC-DATE HOLIDAYS

These holidays have fixed calendar dates and are affected by this change:

- Veteran's Day
- Juneteenth National Independence Day
- Independence Day
- Christmas Day
- Christmas Eve
- New Year's Day
- New Year's Eve

For holidays with **variable dates** (e.g., Thanksgiving, Memorial Day), the same principle applies: only the actual date is in the holiday definition. Use **No Outreach on These Dates** for any observed or adjacent dates as needed.

QUICK REFERENCE

Customer Goal	Outreach on These Holidays	No Outreach on These Dates
Outreach on both actual + observed dates	Add the holiday	Leave observed date out
No outreach on actual or observed dates	Remove the holiday	Add observed date
Outreach on observed only, not actual	Remove the holiday	Do not block observed date
Outreach on actual only, not observed	Add the holiday	Add observed date to block list

PRODUCTION DEPLOYMENT

Deployed to production on **Tuesday, July 8, 2026** as part of **Evolve 26.24.0**.
